RUBY STUDY NOTES: TOC

Important: The third batch of the Free Online Ruby Programming Course starts 7th January 2008. [Register](#) and enroll for the course, now.

Core Ruby

- [Introduction](#)
- [Installation](#)
 - What is Ruby?
 - How Ruby can help you, in more detail
 - Downloading Ruby and an Editor
 - Ruby Programming Environment
- [First Ruby Program](#)
- [Features](#)
- [Numbers in Ruby](#)
 - Operators and Precedence
- [Fun with Strings](#)
- [Variables and Assignment](#)
- [Summary 1](#)
- [Scope](#)
 - Global scope and global variables
 - Built-in global variables
 - Local scope
- [Getting Input](#)
- [Ruby Names](#)
 - Variables
 - Constants
 - Method Names
- [More on Ruby Methods](#)
- [Writing own Ruby Methods](#)
 - Bang (!) methods
- [Summary 2](#)
- [Method Missing](#)
- [More on Strings](#)
 - Listing all methods of a class or object
 - Comparing two strings for equality
- [Simple Constructs](#)
 - Case Expressions
- [Ruby Arrays](#)
- [Summary 3](#)
- [Ranges](#)
- [Ruby Blocks and Procs](#)
- [Random Numbers](#)
- [Read/Write files](#)

[Ruby on Rails and AWS](#)

Get up and running on EC2 and S3 quick with AWS and Ruby on Rails

- Traversing Directory Trees
- Random Access
- **Summary 4**
- **Writing our own Class**
 - Literal Constructors
 - Garbage Collection
 - Class Methods
- **Including Other Files**
- **Ruby Open Classes**
- **Inheritance**
- **Overriding Methods**
 - Usage of super
 - Redefining methods
- **Ruby Overloading Methods**
- **Summary 5**
- **Ruby Symbols**
- **Access Control**
 - Top-level methods
 - Are instance variables inherited by a sub-class?
- **Hashes**
 - Using Symbols as Hash Keys
- **Ruby Time class**
- **Summary 6**
- **Exceptions**
 - Raising an Exception
 - Handling an Exception
- **Duck Typing**
- **Ruby Syntactic Sugar**
- **Mutable and Immutable Objects**
 - Freezing Objects
- **Summary 7**
- **Object Serialization**
- **Constants**
- **Summary 8**
- **Modules/Mixins**
- **Self**
 - The current/default object
 - Top level context
 - Self inside class and module definitions
 - Self in instance method definitions
 - Self in singleton-method and class-method definitions
- **Summary 9**
- **Regular Expressions**
 - Literal characters
 - The wildcard character . (dot)
 - Character classes
 - Special escape sequences for common character classes

Advanced Ruby

- **Socket Programming (last update 2007, Nov. 25)**
 - Basic Networking
 - Port
 - Internet Addresses

- Sockets
- Socket classes
- **Threads**
- The Date Time Server and Client
- **SMTP class (last update 2007, Nov. 23)**
- **Web services (last update 2007, Nov. 25)**
 - Writing a RubyLearning SOAP server and client
- **Ruby MySQL Tutorial**
- **Ruby on Rails**
 - MVC
 - Installation
 - Useful Rails Links
- **Ruby ActiveRecord and MySQL**
- **Ruby/Tk**
 - Simple Tk applications
 - Logger class
- **Unit Testing**
- **Ruby Tools**
 - irb
 - The debugger
 - Profiling
 - ri and RDoc
 - ERb
- **Java to Ruby**
 - Similarities
 - Differences
- **JRuby Tutorial**
 - What is JRuby?
 - Download and Setup
 - Where to use JRuby
 - Resources
 - Useful Articles
- **Solutions**
- **Ruby Quirks**

Francesca B. Cice is an IT Journalist at Programmazione.it, Italy. She has been kind enough to translate the **[Ruby Study Notes in Italian.](#)**

Andrés Suárez García is a Ruby programmer. He has been kind enough to translate the **[Ruby Study Notes in Spanish.](#)**

Juan Alvarez is a Ruby programmer and web developer in Mexico City. He too has been kind enough to translate the [Ruby Study Notes in Spanish](#).
